**C: Reading Passage**

Read the following passage and match each paragraph with one of the **headings**. Write the (A , B, C , D) in front of the numbers of the paragraphs. There is one extra heading. (4 Marks)

**Headings**

- (A) Fast walking brings more physical fitness.  
 (B) People can do different kinds of physical activities.  
 (C) All people like to do expensive physical activities.  
 (D) Walking is an available physical activity for all people.  
 (E) Group physical activities have more fun.

40. There arc many enjoyable activities to take part in. Most doctors advise the simple act of walking. Actually everyone knows how to do it. It is readily available, it is cheap, and it works. You can do it alone, with a friend or with a group. It has a low risk of injury
41. Jogging (walking quickly) certainly is an acceptable form of exercise. It is good to know that you burn just as many calories walking a mile as you do jogging a mile. You could clearly jog more in the same amount of time and therefore burn more calories and gel a greater degree of fitness.
42. Some people find that working out with a friend or a group is more fun than single activities. It can be more enjoyable. You and a friend at home or at work can do a walking program together.
43. There are a lot of activities at health clubs from aerobic exercise, to swimming, and water aerobic ... the list is actually endless. Some people enjoy competitive sports such as handball and tennis. Others enjoy weight lifting. Do you like to ski? How about cutting the grass?

**D: Reading Comprehension**

Read the following passage and answer the questions as required. (6 Marks)

The way you heat or cool your home has a big effect on the Earth. But most people don't usually think about where their heat comes from. Yet not all types of energy sources produce trash or add pollution to the air.

Buildings have a big effect on the environment. **They** use more energy than any other economic category, **including** transportation and industry. Almost half of the energy that buildings use goes into heating and cooling.

A growing number of engineers and architects (people who design buildings) have been looking for new ways to make buildings that don't waste a lot of energy. Improvements have come in many forms, including better coverings, windows, and construction materials.

Architects are also realizing that the size and location of a building affects how much energy it uses. Even the arrangement of buildings in a neighborhood makes a difference.

In the last 10 years, there has been a major movement toward what you would call 'green' buildings. Such buildings are also described as environmentally friendly, or healthy because they produce less pollution to the environment.

44. From the above passage, we understand that most people .....
- a. don't know how to heat or cool their houses    b. look for ways to make buildings less wasteful  
 c. like lo have big and beautiful houses    d. don't think about the source of energy they use
45. The underlined word '**they**' in the second paragraph refers to .....
- a. engineers    h. transportation and industry    c. buildings    d. people
46. According to the passage, the 'green' buildings .....
- a. will be our close friends    b. cause little damage to the environment  
 c. use more energy than any other economic category    d. produce trash or add pollution to the air
47. The passage tells us that architects are trying to .....
- a. build modern buildings    b. look for a different neighborhood  
 c. improve a major movement    d. design buildings that waste less energy
48. The underlined word '**including**' in line 5 means .....
- a. such as    b. as    c. instead    d. without

**True or False**

49. The passage tells us that all kinds of energy produce air pollution.
- a. True    b. False
50. According to the passage, the amount of energy that a building uses depends on its size and location.
- a. True    b. False
